

Follow-up Technical Comments

Bicycle Parking - *Revised proposal still does not fit well for schools as it focuses on visitors, teachers and staff not students and should be broadened to include other forms of human powered transportation consistent with CA-CHPS 2009 SS 2.2 Human Powered Transportation.*

Construction Waste Reduction – *The increment should be changed to be consistent with CA-CHPS 2009 ME 3.1 to 75% or 90% if you are seeking to incentivize the higher threshold.*

Carpet Systems – *Reiterate that CHPS High Products Database should be added to the list of entities. Note: The CHPS High Performance Database may be found at www.chps.net/database.*

Resilient flooring systems – *Reiterate that all references should be to CHPS “High Performance Products Database” instead of “Low Emitting Materials List” as the latter will be retired and removed from the CHPS website at the end of 2009. This should be able to be accomplished without an additional 15-notice as it is without regulatory effect. Note: The CHPS High Performance Database may be found at www.chps.net/database.*

Resilient flooring systems– *Reiterate that all references should be to CHPS “High Performance Products Database” instead of “Low Emitting Materials List” as the latter will be retired and removed from the CHPS website at the end of 2009. This should be able to be accomplished without an additional 15-notice as it is without regulatory effect. Note: The CHPS High Performance Database may be found at www.chps.net/database.*

Thermal insulation – *Reiterate that all references should be to CHPS “High Performance Products Database” instead of “Low Emitting Materials List” as the latter will be retired and removed from the CHPS website at the end of 2009. This should be able to be accomplished without an additional 15-notice as it is without regulatory effect. Note: The CHPS High Performance Database may be found at www.chps.net/database.*

5.504.4.9 – Acoustical ceilings and wall panels – *Reiterate that all references should be to CHPS “High Performance Products Database” instead of “Low Emitting Materials List” as the latter will be retired and removed from the CHPS website at the end of 2009. This should be able to be accomplished without an additional 15-notice as it is without regulatory effect. Note: The CHPS High Performance Database may be found at www.chps.net/database.*
